TO WHOM IT MAY CONCERN

RE: EURO COMMERCIALS LIMITED - EUROCOM

I am writing to recommend Euro Commercial Limited to you for consideration as a key player on construction projects as far as Logistics and equipments is concerned. They managed all heavy and power plants Generators, transformers moving them across Tanzania Between 2011 to 2015.

Eurocom has worked with Symbion Power Tanzania Limited as a subcontractor on several key projects in Tanzania. The company successfully implemented the projects in various phases to completion, including projects that involved in logistic management for a 126 MW Ubungo Plant, 50MW Arusha Power Plant, and 55MW Dodoma power plant I'm glad to say that Eurocom brought these projects to completion on budget and on time.

In addition to construction expertise, Eurocom built a strong relationship while representing our interests. They led each project with a desire to produce a result that reflected our heart and values. Eurocom is very knowledgeable about both, the design, planning and implementation of undertaken projects.

They are undeniably great managers of high expectations and excellent managers of multiple projects or tasks and leverages well the ability of everyone they have had worked with. Most important to me, though, is that I know I can trust Eurocom. I may not always like their decision but I know their integrity.

I know you will be pleased with the result of what will be accomplished just as we are with each of our projects. Please call me directly if there is any more I can tell you about Eurocom's capabilities. I believe in them very strongly.

.....
